Creating the new economy – a blending of arts and science

Flower Garden Auction

Edmonton Horticultural Society
A horticultural splash of colour, imagination and creativity!

Not to be missed...as summer winds down, come see and take home for someone special rich memories of the summer. Donated by the renown suppliers supporting this Region's growing reputation as a horticultural centre. Proceeds are being donated to our "Engaging Youth – the future of work" project. Charitable tax donations apply.

PRESIDENT'S MESSAGE

Welcome to Moonlight in the Meadows, ABCEch's annual barbeque and networking event. Every year we host multiple events in unique and creative spaces that act as collision spaces where people and ideas meet serendipitously. Our hope is that these encounters will lead to new ideas and business opportunities.

- formation of Global Edmonton - consolidating the Region's economic development and enhancing its global attraction
- introduction of Techinvest - our technology investment fund, targeting high growth, disruptive technologies
- the creation of a Western Canada Hemp Industry bringing together 95 different affiliations including the federal / provincial / municipal public sector, farmers and farm suppliers, investors and NGOs, producers of hemp products, researchers and consultants
- our student research into the future of work, highlighting the concern of students with emerging technologies and their commitment to continuous learning
- our semi-annual monitor of Alberta's economic resilience - still weak but improving, as is the associated innovation ecosystem.

As for today, please enjoy this year's celebration of innovation and innovators designed to attract researchers, entrepreneurs, technology companies, policy influencers and interested public with local entertainment and a unique horticultural auction with proceeds going to supporting the engagement of youth in technology and innovation.

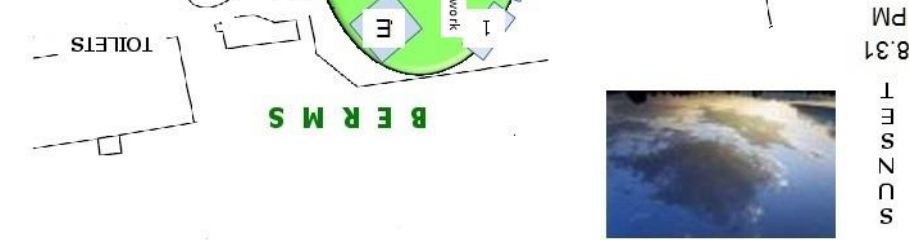

As our Founder and CEO - Perry Kinkaid, always reminds us, "ideas without relationships have no value". We hope that you will enjoy the eclectic program and come away with one or more people you will have a coffee or beer with to discuss the implementation of a new idea.

Sincerely,
 Klaas Rodenburg, MA, C.Tech, LEED AP
 President, Alberta Council of Technologies Society
