### **Tennessee Williams – playwright**

You: Hello Tennessee, it's a honor to speak with you. Can you tell me, what is the underlying message or theme in your plays?

Tennessee Williams: Hello. The underlying message in my plays is often the struggle of the individual against societal norms and conventions, and the search for identity, love, and fulfillment in a world that can be cruel and oppressive.

You: Your works have had a profound impact on American theater and continue to be widely performed today. What inspired you to become a playwright?

Tennessee Williams: I have always had a love for the arts, and writing plays allowed me to express my thoughts and emotions in a way that was cathartic and meaningful. I was inspired by the works of writers such as Henrik Ibsen, August Strindberg, and Anton Chekhov, and I sought to continue their tradition of exploring the complexities of the human experience.

You: Your plays have given voice to characters who often struggle with their place in society, and your themes are still relevant today. Thank you for your contributions to the world of theater.

Tennessee Williams: You're welcome. I hope that my plays will continue to inspire and challenge audiences for generations to come.

### **Taylor Swift – about life's challenges**

You: Your music often touches on life's challenges and struggles. How do you personally handle and overcome life's challenges?

Taylor Swift: I believe that challenges are an inevitable part of life, but they can also be opportunities for growth and self-discovery. When I face challenges, I try to approach them with a positive attitude and focus on finding solutions. I also find comfort in talking to loved ones, practicing self-care, and finding things that bring me joy and fulfillment.

You: Your music is a source of comfort and inspiration for so many people. What advice would you give to someone who is facing a difficult time in their life?

Taylor Swift: I would tell them to hold onto hope and believe in their own strength and resilience. It's also important to reach out for help and support from loved ones, and to take care of themselves in any way that brings them comfort and peace. And most importantly, never give up and always keep pushing forward.

You: Your words of encouragement and wisdom have touched so many lives. Thank you for sharing your thoughts and experiences with us.

Taylor Swift: Thank you. I feel so grateful to be able to connect with people through my music and share my experiences. It's truly a privilege.

### **Jesus Christ – with respect**

You: Hello Jesus, it's an honor to speak with you. Can you tell me, what is the most important message you want people to understand about your teachings?

Jesus Christ: Greetings, my child. The most important message I want people to understand is to love one another as I have loved you. This love should be unconditional and extend to all people, regardless of their beliefs or actions.

You: That's a powerful message. How can we better embody this love in our daily lives?

Jesus Christ: By following the two greatest commandments, to love the Lord your God with all your heart, soul, mind and strength, and to love your neighbor as yourself. And by treating others with kindness, compassion, and forgiveness, just as you would want them to treat you.

You: Thank you, Jesus. Your teachings have had a profound impact on the world and continue to inspire people to this day.

Jesus Christ: I am grateful for the opportunity to share my message, and I pray that all people may come to know and understand the love of God.

### **Albert Einstein – brilliant**

You: Hello Albert, it's a privilege to meet you. What do you consider to be your greatest contribution to science?

Albert Einstein brilliant: Greetings. It's difficult for me to pick just one contribution, but I suppose the theory of general relativity, which describes the laws of gravity and the large-scale structure of the universe, is one that I am most well known for.

You: That's amazing. How did you come up with such a revolutionary idea?

Albert Einstein: Well, I have always been fascinated by the concept of gravity and its impact on the movement of objects. I spent a lot of time thinking and visualizing what the universe might look like if I were falling freely through it, and that led me to develop the theory of general relativity.

You: Your work has changed the way we understand the world and the universe. Thank you for your contributions.

Albert Einstein: It is my pleasure. I believe that science and discovery are important ways for us to understand the world around us and to make a positive impact on society.

### **Lebron James - funny**

You –with respect: Hey LeBron, what's up man! It's great to finally meet the king of the court.

LeBron James: Ha! Thanks for the compliment, but I prefer to think of myself as the jester of the court.

You: Well, you sure know how to make the basket laugh. So, what do you do to keep your game sharp and stay motivated?

LeBron James: I like to play a little one-on-one with my teammates, and sometimes I even let my kids beat me just to keep things interesting. And as for motivation, I just remind myself that if I stop playing basketball, I'll have to get a real job.

You: That's hilarious! By the way, what do you consider to be your greatest dunk of all time?

LeBron James: Oh man, that's like asking a parent to pick their favorite child! But I'd say the one where I took off from the free throw line in the 2008 All-Star Game was pretty sweet.
