smart MTX
Smart Manufacturing Technology Exposition

The **Future** of Canadian Manufacturing is Here

In order to compete in a crowded global market, Canadian manufacturers need to innovate. Smart technology can improve your product quality, reduce operating expenses, and improve supply chain efficiency. SmartMTX is Western Canada's newest platform to explore ideas and opportunities that fuel manufacturing growth and innovation. If you're ready to take the next step with your manufacturing business, SmartMTX is for you.

Advancing innovation in manufacturing in Western Canada

About MEE Cluster

Launched in early 2021, the "MEE Cluster" is an industry-led initiative that supports growth and enhances global competitiveness of the Western Canadian manufacturing industry. Cluster-led initiatives are focused on facilitating industry collaboration, reducing the risks associated with innovation, and accelerating technology adoption.
